Strengthening CQI in Public Health Units Group

This group is for public health unit (PHU) staff and stakeholders interested in developing a best practice approach to strengthening continuous quality improvement (CQI) within and across Ontario's PHUs. Members will gain access to examples of CQI case studies and other resources developed through a Public Health Ontario (PHO) Locally Driven Collaborative Project (LDCP). The group will use this space to knowledge share, ask/answer questions, and network to facilitate movement along the CQI maturity continuum.
